## Trailer specifications

## Dimensions and weights

895 mm*

| Weights in kg | Netherlands |  | Germany |  | England |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | C \& U | Special types | C \& U | Special types | C \& U | Special types |
| Maximum fifth wheel load | 23000 | 23000 | 23000 | 23000 | 23000 | 23000 |
| Maximum bogie load | 30000 | 30000 | 30000 | 30000 | 30000 | 37500 |
| Gross load capacity | 53000 | 53000 | 53000 | 53000 | 53000 | 60500 |
| Tare weight, app. | 14500 | 14500 | 14500 | 14500 | 14500 | 14500 |
| Net load capacity, app. | 38500 | 38500 | 38500 | 38500 | 38500 | 46000 |

## Your benefits

## Neck

- The (single beam) neck height is 230 mm and suitable for 23T fifth wheel pressure. Under rear side of the neck accordance ISO chamfer
- Front extension 1400 mm Chamfered corners at front $400 \times 400 \mathrm{~mm}$
- Fifth wheel height 1170 mm
- Neck width 2530 mm
- Rear swing cleareance 2350 mm
- Hard wood floor of 28 mm thick
- 2" Kingpin, fitted under a ball bearing turntable. The turntable is connected to two double action hydraulic steering rams. Holder is suitable for mounting a 3,5" kingpin
- 10T certified lashing rings (max. Load 5T) . According NEN12640
TÜV Certificate
- 32 mm holes in the side rave, to use as lashing point
- Divided at the side raves of the neck, dim. $96 \times 66 \times 6 \mathrm{~mm}$, suitable for stakes of $81 \times 51 \mathrm{~mm}$
- Spare wheel carrier at front of the gooseneck. Suitable for one spare wheel.
- Slope for easy access of the neck $600 \times 12^{\circ}$. U profile for the attachment of aluminium ramps
- Landing gear two speed vertical lift, with S foot. Static capacity of 50.000 kgs
Floor
- The torsion rigid chassis is in the lower deck extendible in increments of approx. 500 mm . Air assisted locking pins are fitted to either side of the main beam and operated by a single two way valve.
- Height of axle bogie 895 mm (loaded)
- With a central main beam of high tensile steel
- Fixed part 850 mm
- Width of loading area 2530 mm
- 'Pull out' galvanised outriggers to increase the overall lower deck width by 500 mm ( 250 mm per side of the trailer)
- 37 mm nominal hardwood in the lower deck. 8/10 mm steel chequer plate fitted over the suspension area
- Heavy duty side raves 240 mm deep, welded by strong steel cross members to chassis
- All air and service lines are located in an energy chain within the central main beam. Resulting in improved ground clearance and reduced maintenance
- 10T certified lashing rings divided in the side rave of the loading floor, placed every approx. 1.2 meter, according EN12650 with TÜV Certificate
- 32 mm holes in the side rave, to use as lashing point
- Rope hooks. On each side of the trailer
- Stake pockets divided at the side raves of the trailer, dim. $96 \times 66 \times 6 \mathrm{~mm}$, suitable for stakes of $81 \times 51 \mathrm{~mm}$
- Container position for 1x 20 Ft (Container mountings are optional)
- Container position for $1 \times 30 \mathrm{Ft}$ (Container mountings are optional)
- Container position for $1 \times 40$ Ft (Container mountings are optional)
- Container position for $1 \times 45 \mathrm{Ft}$ (Container mountings are optional)
- Beavertail $850 \mathrm{~mm} \times 8^{\circ}$ for easy access of the lower deck
- Beavertail with $8 / 10 \mathrm{~mm}$ checkerplate floor
- At the rear of the chassis a pair of drop down steady legs to support the chassis beaver tail when using the ramps

## Axle bogie

- Gigant 12T axles
- Axle quantity: 3
- The bogie is fitted with 13T air suspension and heavy duty airbags for optimum stability
- Broshuis hydraulic steering system, consists of two fully independent circuits.
- Butterfly section, with adjustable conical bearing, resulting in extremely low maintenance,
- Adjustable steering rods, to correct axle alignment tracking to compensate for wear during the life of the trailer.
- Air, electrical and hydraulic service lines are housed inside the central spine(s) in an energy chain
- First axle is fixed, 2 axles are hydraulic steered
- Tyre Pressure Monitoring System according ECE R141
- Distance between axles is 1810 mm increasing the legal axle load up to 10 ton per axle
- A raise and lower valve is connected to the air suspension for ease of loading or unloading
- Manual override steering with 3kW electrical pump
- Electrical hydraulic override steering system, to allow the axles to steer independently of the tractor unit, by means of buttons. Full automatic alignment system.
Full automatic pre-stressment system up to 32 bar for direct steering response. Additional hydraulische operation under the gooseneck
- Two air line Wabco brake system, EC-approved design with an automatic load sensing device. Spring type chambers fitted to two axles for the hand brake. Incl. EBS
- Tyre brand to choice of Broshuis (Continental, Goodyear or comparable). 245/70 R17.5
- Steel rims, light grey

## Ramps

- Hydraulic ramps $4000 \times 890$. Width adjustment is hydraulically operated
- Hardwood floor in ramp
- The ramps not detachable

## BROSHUIS

## Lights

- Lights are complete in LED
- 5-chamber rear lights and Led side-marker-lights. Conform EU-specifications
- One rear flashing beacon connection at the rear side
- On each side at the neck and hydraulic ramp a connector fitted with holder for extendible marker board lights
- Connector for over width marker board lights: 3 pin plug

## Accessories

- Spare wheel $1 x$
- EBS connector
- Connectors at the front: Dual 7 pin SAE plugs
- Air couplings palm type
- A 35mm2 cable between truck and trailer for the use of any electrical power supply
- 24 V power connector NATO
- The chassis is equipped with white reflective tape on sides and red reflective tape on the back

## Paintwork

- Metallized and finished in one colour. (non-metallic)
- After chassis assembly, the support brackets for valves, air tanks and pipe and wiring runs are fitted. The completed chassis is then shot blasted and immediately painted according to the Broshuis 2 K paint system. The final fitting of all the components is carried out after the chassis has been through the preservation process
- Supplied Axles are painted black, for better rust prevention
